

Lemonade Stand Answer Key

Amount you make per glass: Sell each glass for .50 and it costs you .10 to make each glass. You will make .40 per glass.

Profit: $.50 - .10 = .40$ per glass \times 150 glasses sold = \$60.00 - \$5.00 start up fee = \$55.00

Number of glasses to sell to make \$150.00 + \$5.00 start up fee:
 $(\$150.00 + \$5.00) \div .40 = 387.5$ glasses
